- Backend Technologies: Node.js, Express.js
- Database: MySQL, MongoDB
- Version Control & Testing Tools: Git, GitHub, Postman
- Development Tools: Visual Studio Code, Vercel, Render

## Education

- SAL Institute of Technology & Engineering Research — (B.E. CSE)  
CGPA: 6.95 | SPI: 7.15 | Graduated: Oct 2024
- Higher Secondary Certificate (HSC) — 76% (PCM) | 2019
- Secondary School Certificate (SSC) — 71% | 2017

## Projects

**Fikri Shop** - an Ecommerce webApp [Live](#) || [Code](#)

Fikri Shop is an eCommerce web application built using modern technologies and best security practices. The platform implements JWT token-based authentication for secure access and uses bcrypt hashing to securely store user passwords. It also integrates the Razorpay payment gateway for online payments. The system includes role-based access control for Admin, Seller, and Customer modules.

- JWT-based Authentication & Authorization
- Secure Password Hashing using bcrypt
- Razorpay Payment Gateway Integration
- Role-Based Access Control (Admin, Seller, Customer)
- Modern and Responsive E-Commerce Interface
- Secure and Scalable Backend Structure

Tech Stack: React.js, Redux, Node.js, Express.js, MongoDB
